Scientist Officers conduct high-quality science at their duty stations—in fields ranging from psychology to nutrition to molecular biology and beyond. The annual SciPAC Bibliography is a compilation of Scientist Officers’ publications and presentations. The 2018 Bibliography is based on a combination of self-reported data and searches conducted by Scientist Officers. It does not necessarily represent all works completed by Scientist Officers; however, it does highlight the wide array of scientific expertise as well as impact and reach of the Scientist Category. Scientist Officers’ names are shown in bold.

**Summary: Number Published in 2018**
