

SciPAC Mentor/Mentee Application

There are two types of mentoring programs supported by the SciPAC mentoring committee: the Mentoring Program and Peer Support Network. The Mentoring program provides career guidance, information, and assistance by pairing mentees with more senior Scientist officers who can offer a wealth of knowledge and experience. The Peer Support Network supports and guides recently called to active duty (or ready reserves) (CAD) officers by easing the transition during acclimation into PHS and guide officers through the onboarding process.
